Business Cards Firmware

IEEE Penn State - Projects Committee
FA26

Attendance Form

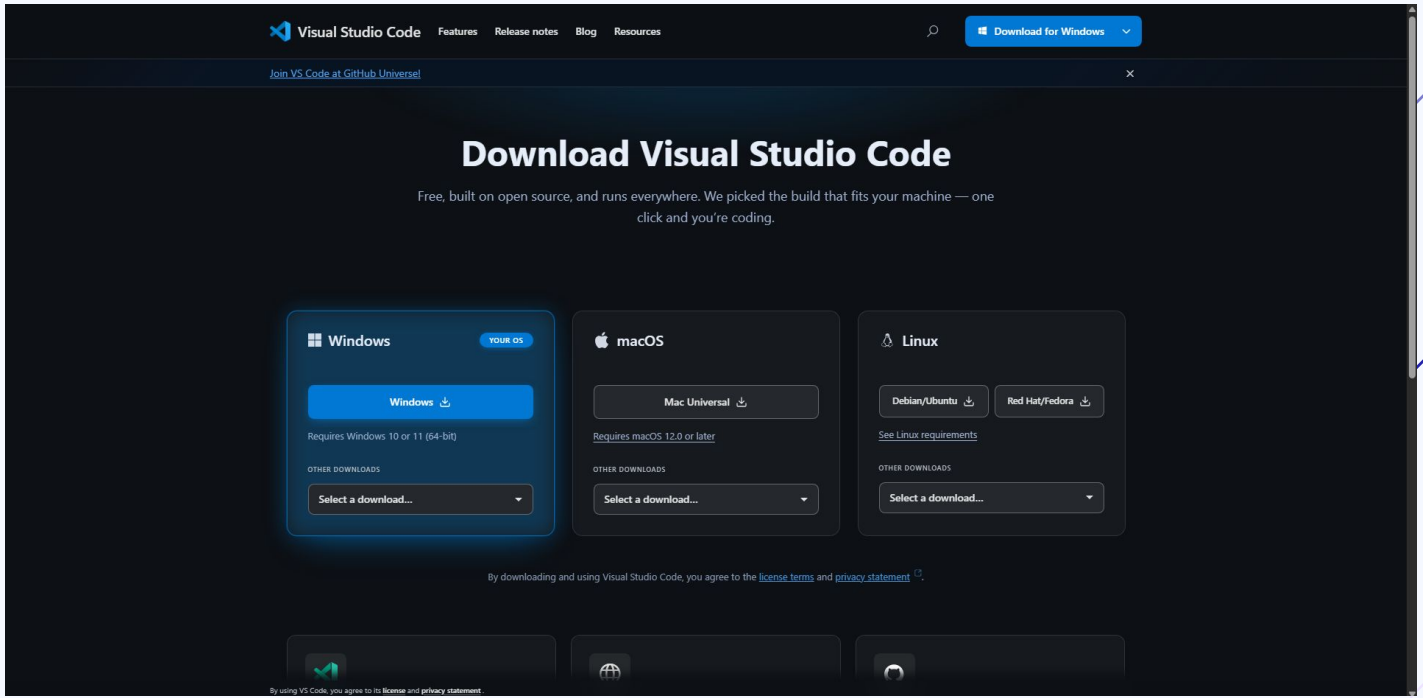

Overview

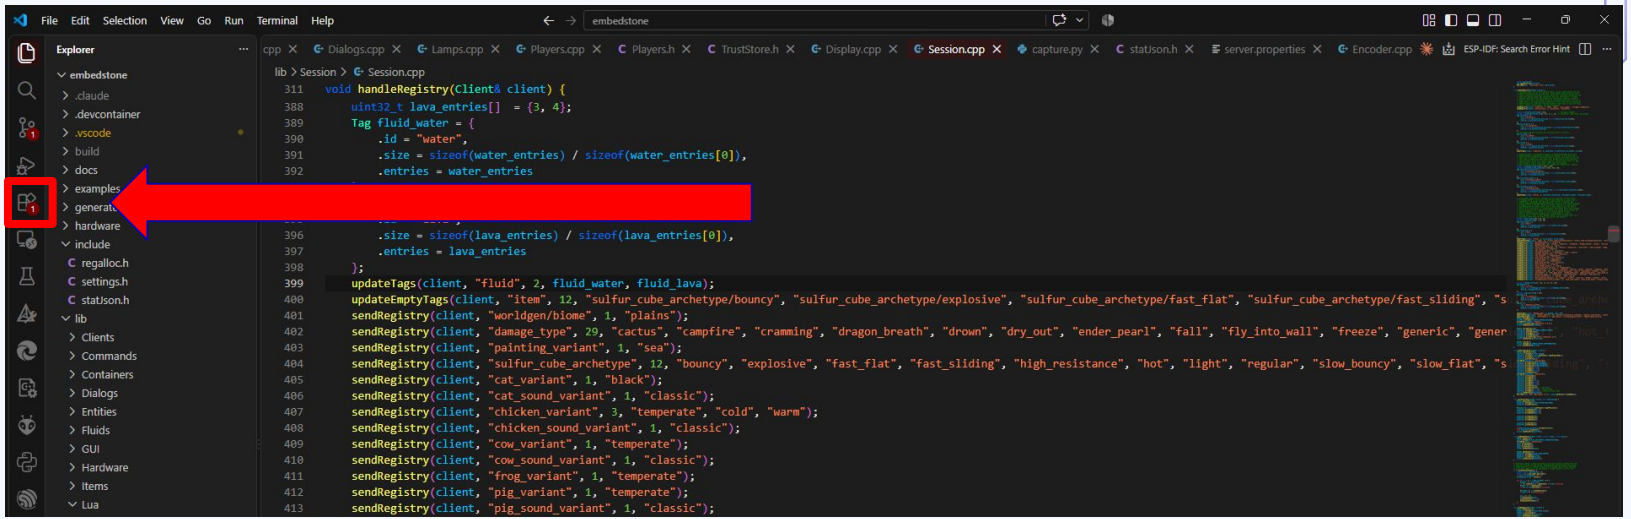

- We will be utilizing **Platform IO** through VS Code to program the MCU on the Business Card
- The MCU is what controls the screen, allowing you to play a game on the card!
- Code for the brick breaker game will be provided on the Github
- Edit the code to include your name
- If you have C coding experience, feel free to add, or change features, or make a new game!

Download VS Code

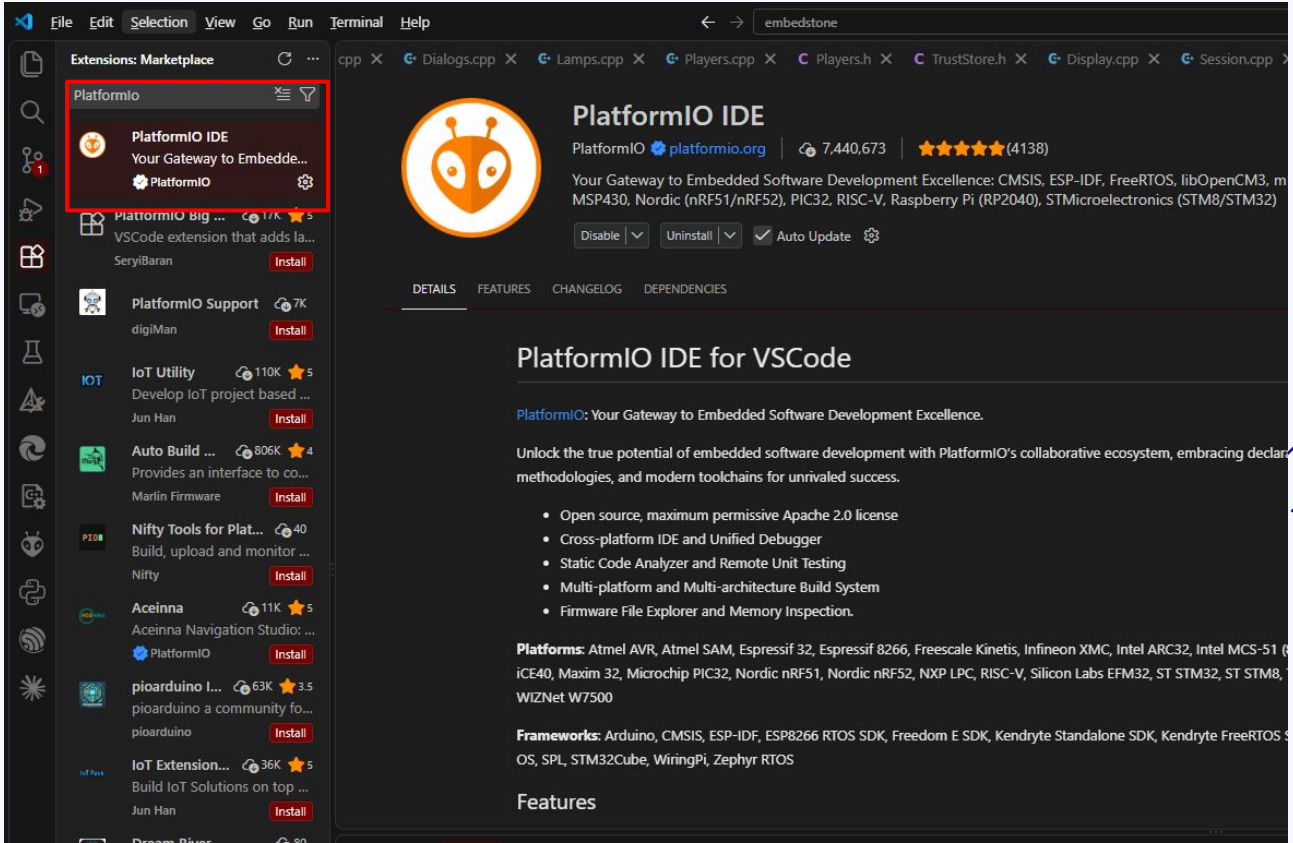

Navigate to **https://code.visualstudio.com/download**

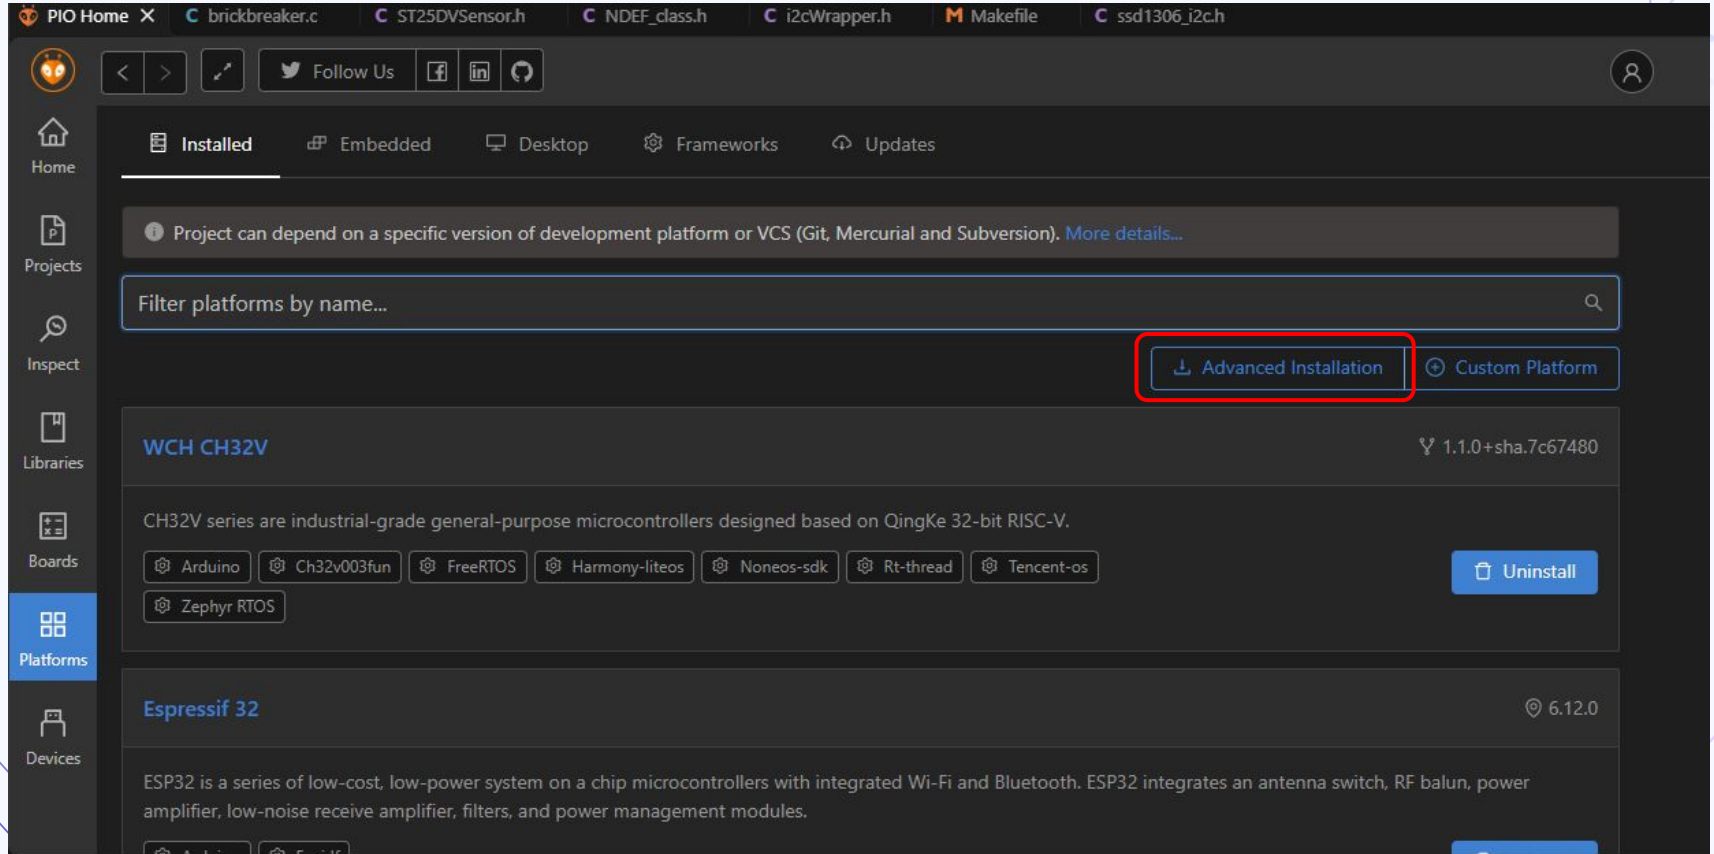

Go to extensions

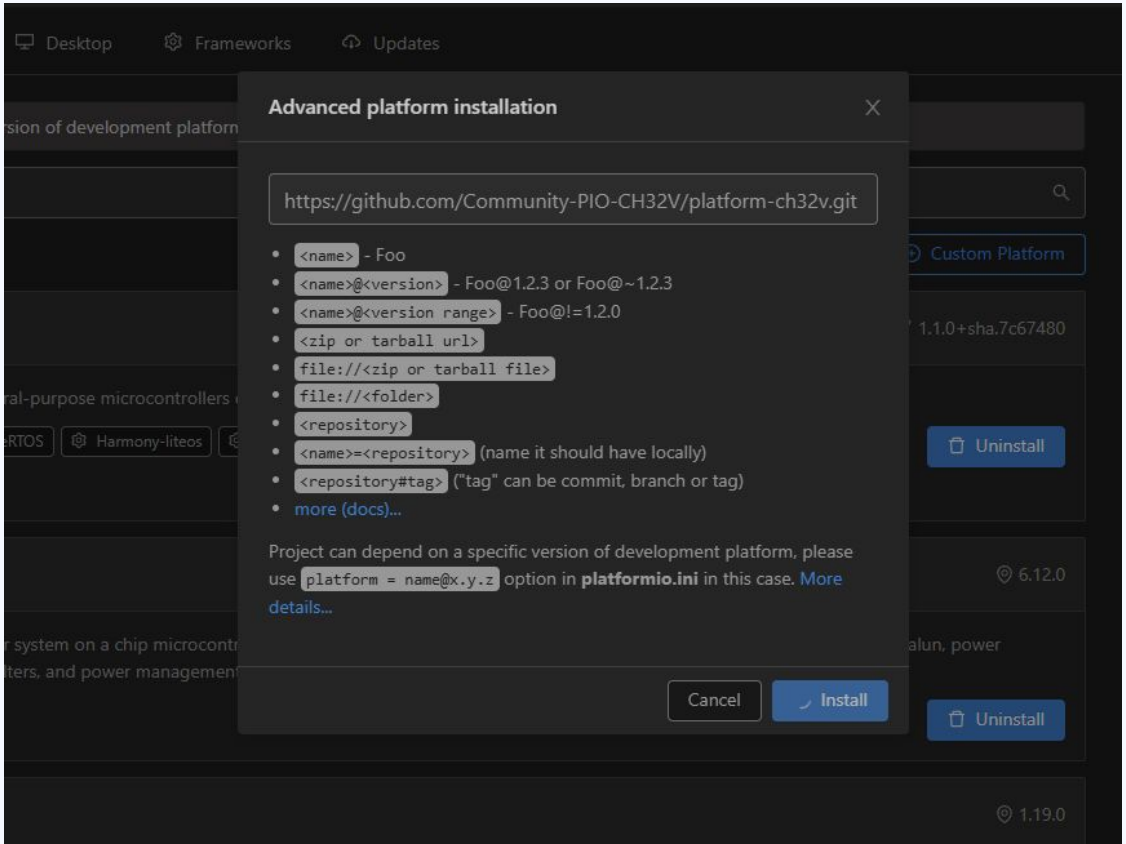

Download PlatformIO

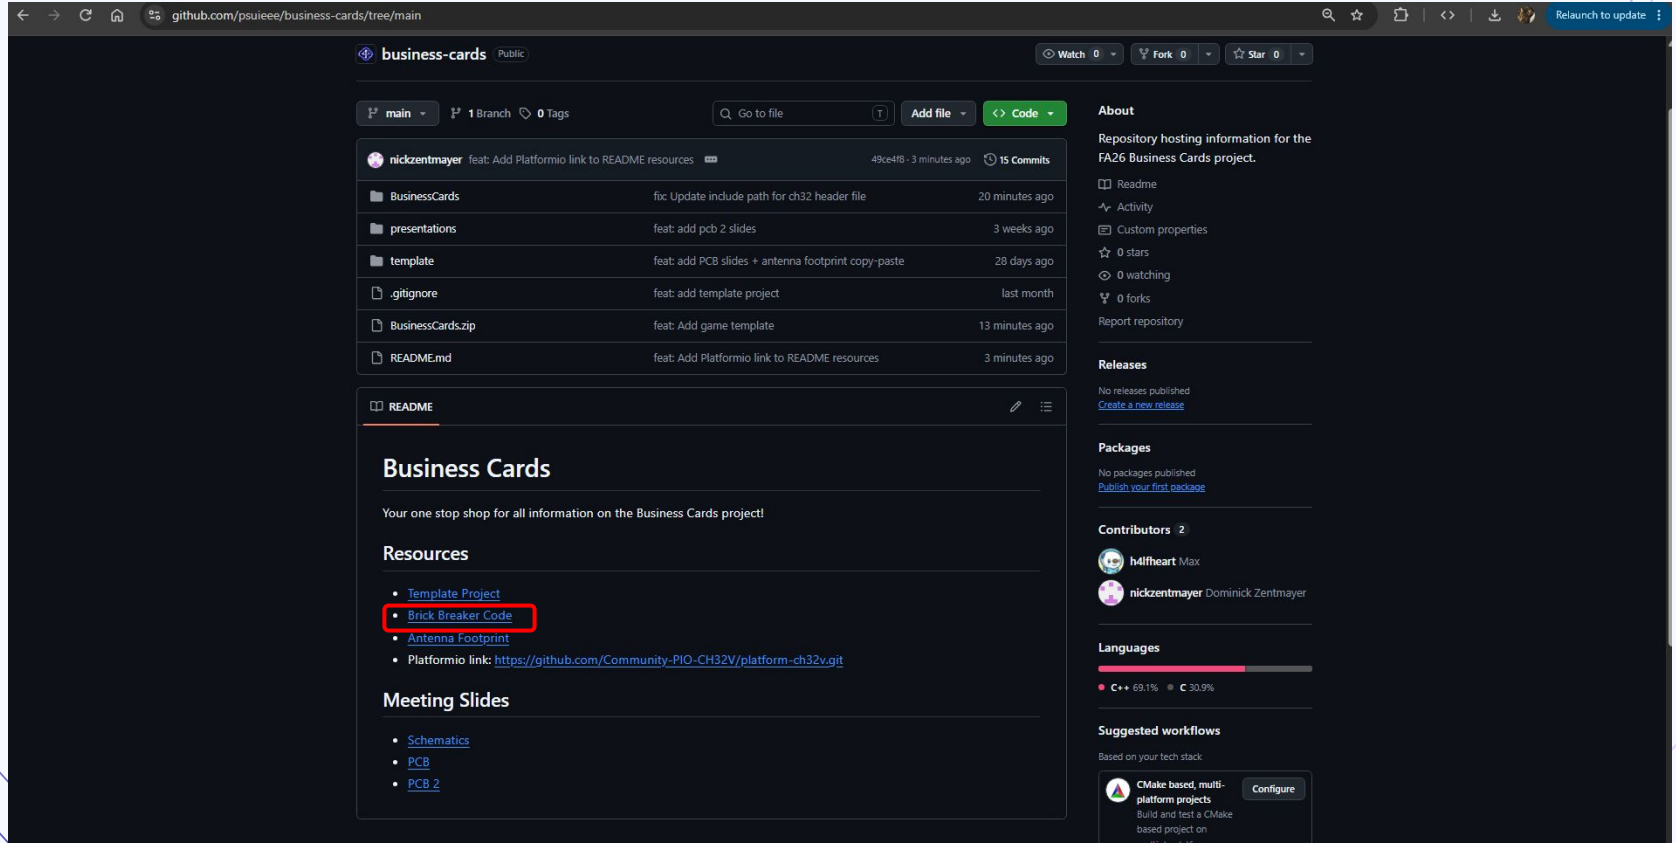

Download platform

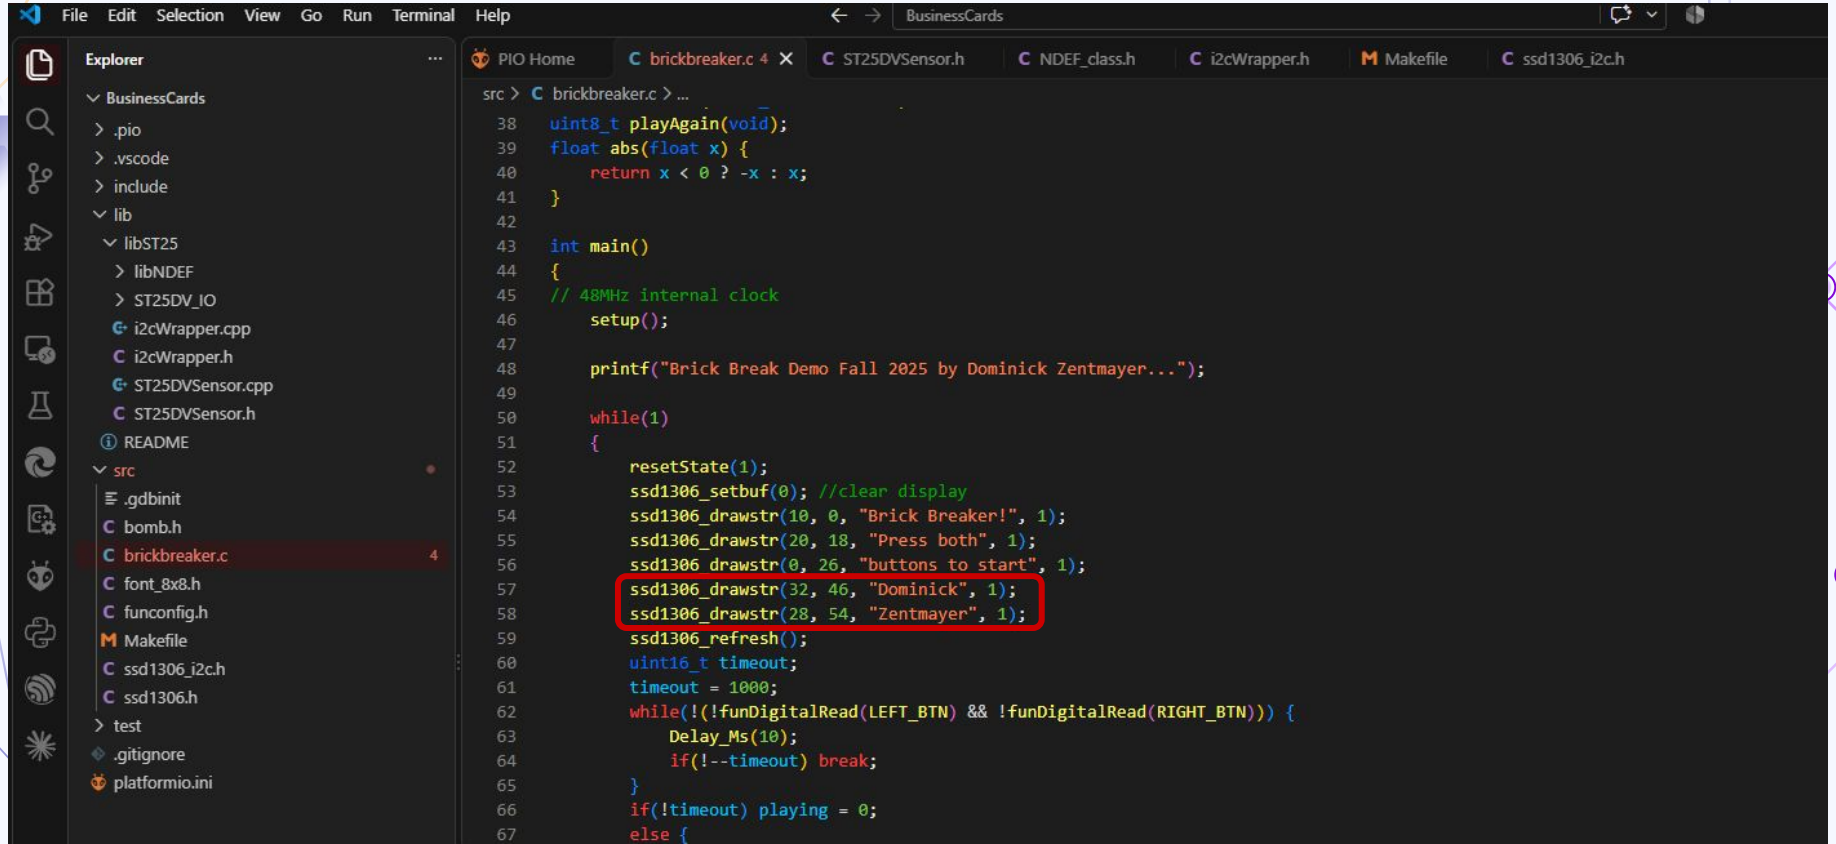

Download Platform cont.

Download Template

Open and Edit Name

Continuing from here

- Feel free to modify the code however you like
- Use the build (checkmark) button to make sure your code compiles
- Once we assemble the cards next week you can flash and test your code
